

Instructions for the Kangaroo/Koala Inlay Kit

There's a total of 10 pieces in this kit. The woods used are Black dyed Alder, and Red Mallee Burl.

We'll start by sliding the brass tube into the maple barrel. This will help align the pieces as the kit is being assembled. All the pieces in this kit will be assembled in numerical order. Secure pieces with the supplied elastic bands as needed.

Once all pieces are in place, remove the brass tube and permanently secure the pieces by flooding thin CA glue over all the seams. Once the thin CA has completely cured we're going to glue in the brass tube. Scuff up the tube with 100G sandpaper before gluing. I prefer 2-part epoxy to glue the brass tube in place. Make sure to center the brass tube so everything will be centered when trimmed to final length. Once all glue has cured, sand the ends flush to the brass tube (don't use a barrel trimmer) and mount on the lathe for turning and finishing.
